## Background

In the spring of 2006, the Crafton Hills College Student Trustee and the Student Senate of The Associated Students of Crafton Hills College (ASCHC) collaborated on the development of a survey of student satisfaction with campus life, with some help from the Office of Research and Planning. The impetus for this project: Crafton Hills College had not administered a survey to assess student perceptions on issues pertinent to their experiences on campus in more than 5 years. Because the Student Senate President and Student Trustee desired to learn more about what the student populace expects of its student leaders, a survey of Student Satisfaction with Campus Life was administered to a random selection of more than 800 students (yielding 797 usable surveys) from April 17, 2006 through May 5, 2006. See Appendix F for copy of project proposal.

The survey encompassed various aspects of student life, directly addressing students' perceptions of the following:

- safety on campus and maintenance of the physical environment;
- clubs, organizations, and activities available to students;
- programs and services provided for students; and
- general questions about their CHC experiences.

The intent was to use the findings to assist ASCHC in their development of a strategic plan for student advocacy. Moreover, findings will be shared with the campus community to inform institutional planning and program improvement.

## Survey Components

Physical Plant/Campus Environs: Survey items related to this component addressed student perceptions of basic safety and comfort with campus physical surroundings (for complete list of items see Appendix A).

Student Clubs, Organizations, Special Events \& Activities: Several survey items related to student perceptions of the clubs, organizations, special events and activities held on campus for the purpose of enriching students' extracurricular experiences. According to Tinto's (1975) theory of student attrition ${ }^{1}$, such social activities can contribute to retention if student experiences are positive. Through a steady series of satisfying social encounters on campus-both formal and informalstudents develop a stronger connection or sense of identity with the institution which, in turn, leads to better retention. Tinto's term for this phenomenon is "integration," defined as "the extent to which the individual shares the normative attitudes and values of peers and faculty in the institution and abides by the formal and informal structural requirements for membership in that community" ${ }^{2}$. In the case of extracurricular activities, it is students' SOCIAL INTEGRATION with the campus community that is intended to be impacted. The relevant items which appeared on the survey are shown on Appendix A.

Educational Programs and Services: Several survey items also related to students' reasons for choosing CHC over the many options available in this region, and their perceptions of CHC's educational programs and student services. Consistent with Tinto's theory ${ }^{1}$, it is primarily students' academic integration with the campus community that is the focus of various instructional support services provided. See Appendix A for survey items relevant to this component.

Students were also asked to rate the quality of customer service received from the following: Admissions \& Records; Counseling \& Assessment; Financial Aid Office; Bookstore; Transfer \& Career Center; Associated Students Office; Campus Business Office; Cafeteria; Campus Police; Communications Office; Campus Library; Learning Resources Center; Health \& Wellness Center; EOPS/CARE/CalWORKS; Disabled Students Office; Student Success Advisors; and Faculty/Teachers.

Student-College Integration. Additional questions related to students' overall sense of identification with CHC. Once again, the list of survey items relevant to this component appears in Appendix A.

[^0]
## Summary of Major Findings ${ }^{3}$

## Physical Plant/Campus Environs:

Evidence. The majority of students Agree/Strongly Agree that the campus is a safe place to be during the day (total of 754 or $97.3 \%$ of all respondents). Fewer reported feeling safe at night ( 480 or $61.2 \%$ ), but there is still a large number of students who do not feel safe on campus at night (204 or 25.6\%).

With respect to the general appearance of the campus, a majority of students Agree/Strongly Agree that the campus is beautiful when compared to other community colleges (541 or 77.1\%). As for the condition of campus classrooms and facilities, the majority of students (379 or 47.5\%) indicated No Opinion (232 or 29.1\%) or Disagree/Strongly Disagree (147 or 18.4\%), which is a few more than the 323 students who indicated Agree/Strongly Agree (40.5\%).

Conclusions. Students' perceptions of the physical condition of campus environs are generally positive, with some room for improvement to CHC's interior spaces, and to its exterior spaces particularly at night. The impact of activities (recent and ongoing) that address maintenance, cleanliness of classrooms, overall "paint and patch," upgrades to campus lighting and security, and other improvements to campus facilities have been noticed by students.

Recommended Implications for Practice/Planning Next Steps. This finding is validation of standard ongoing efforts to maintain and enhance the physical plant and campus security, in addition to more recent activities around facilities master planning-in particular, additional efforts to highlight the unsatisfactory conditions of certain classrooms. Subsequent responses across campus have ranged from direct effects of actually upgrading such classroom conditions, to indirect effects of raising the conscious awareness of the campus community to the importance of both exterior and interior spaces. Appropriate kudos should be extended to the dedicated employees who toil daily to maintain our grounds and facilities, and to those conscientious individuals who saw a problem, and brought attention to that problem so that it could be addressed.

Certainly, the beauty of the campus's exterior spaces can be a positive single point to make as we proceed with master planning or development of a marketing campaign. However, while the physical beauty of the campus may factor into a student choosing to attend here initially, it is highly unlikely that it is a major contributing factor to why students stay here- especially if attention to classroom conditions and other key factors does not continue. Consider the possibility that students who become initially captivated by the campus' beautiful exterior spaces could become discouraged from returning to CHC simply by the sheer contrast with the degrading conditions of its interior spaces, or by the unsatisfactory conditions of its programs and services. In this regard, other aspects of this survey warrant more attention as they are more relevant to understanding why students stay.

[^1]Student Clubs, Organizations, Special Events \& Activities: This component is made up of the vast majority of items on the survey. In order to piece together a clear picture, results will be organized around the following themes: Student Awareness; Student Interests; Student Satisfaction. While most items are broad, specific items regarding textbooks were included as follow-up indicators from focus groups conducted by ASCHC last year.

With respect to actual student participation in clubs, organizations, events or activities, the following was found: 276 or $34.6 \%$ participated in at least 1 special event or activity in the past year; 73 or $9.2 \%$ of respondents self-reported as actively involved in at least 1 student club or organization.

## Student Awareness

Evidence. The majority of students indicated Disagree/Strongly Disagree or No Opinion in response to statements about awareness of ASCHC and its role ( 584 or $73.3 \%$ ), the student clubs and organizations available (551 or 69.1\%), and special events and activities on campus ( 437 or $54.8 \%$ ). This pattern is partially upheld among the 276 students who have attended at least one special event or activity: 191 or $69.2 \%$ of these 276 students indicated Disagree/Strongly Disagree or No Opinion in response to statements about awareness of student clubs and organizations. However, as might be expected for this group, the pattern changes when it comes to awareness of special events: 164 or $59.4 \%$ of 276 students indicated Agree/Strongly Agree to the statement, "As they arise, I am made aware of all the special events \& activities offered at CHC throughout the year."

Also as might be expected, a different pattern is found among students who claim to be actively involved in at least one student club or organization: More than 63\% indicated Agree/Strongly Agree to awareness of student clubs, organizations as well as special events and activities. Note that this is a very small subset of students ( 73 or $9.2 \%$ of the total sample of 797); and while a majority indicated awareness, given the selected bias of this group, the number aware of clubs, organizations, events and activities is arguably lower than might be expected. Additionally, among this elite group of involved students, 39 of them or $53.4 \%$ indicated Disagree/Strongly Disagree or No Opinion to the statement about awareness of the role ASCHC plays in the lives of students.

Conclusions. Overall, there is a marked absence of awareness among students about the clubs and organizations available. Awareness of special events and activities is somewhat better, owing perhaps to the tendency to focus more actively on communications and dissemination when something novel or unique occurs-that is, it may be that more concerted marketing efforts exist around single events rather than on ongoing club-based activities. Both types of activities (special events and clubs) constitute formal opportunities for students to interact with peers, thereby facilitating social integration as described in Tinto's model ${ }^{4}$. However, because

[^2]clubs and organizations involve sustained activities for students around shared interests with both peer and faculty interaction, the potential for a positive impact on student learning and retention is arguably greater since both academic and social integration are involved.

Recommended Implications for Practice/Planning Next Steps. Overall, improvements are needed in the communications focused on increasing student awareness of all extracurricular activities available on campus. Both Tinto's model ${ }^{3}$ and the findings herein underscore the need to reconsider the allocation of time, effort, and material in such efforts relative to the type of extracurricular offering. If there are indeed more resources allocated to creating hype around one-time, special events and activities as opposed to educating students about the merits of active membership in ASCHC, clubs, or organizations, such an allocation may be disproportionate to the potential overall benefit to student life.

That is, it may be imprudent to spend more on communications for single events and activities than on the potentially longer term commitments to ASCHC, clubs, or organizations when you consider that the return on that investment (i.e., in student academic and social integration) is potentially better for ASCHC, clubs, or organizations. An important caveat: This is predicated on the assumption that ASCHC, clubs, and organizations actually provide ample interactions with peers and faculty that are positive, rewarding, and relevant to students' academic experiences. Arguably, more explicit connections between the social aspects of clubs and organizations with students' academic experiences can strengthen students' intentions, goals, and institutional commitments over time-which, in turn, contributes to student learning and retention. The campus community only needs to look at the approach used by faculty in the Emergency Services program for an example of best practices in facilitating academic and social integration that is linked to better student learning and high student retention.

All the foregoing notwithstanding, even the most organized, well-designed student club or organization will fail if it does not capture student interests.

## Student Interests

Evidence. A majority indicated Disagree/Strongly Disagree in response to the statements, "I have no interest in being knowledgeable about or involved in any student clubs or organizations" (416 or 52.2\%), and "I have no interest in attending or participating in any special events or activities offered at CHC, unless it is specifically related to a class assignment" (461 or 57.8\%).

With respect to the need for new extracurricular offerings, 300 of the 424 students with an opinion (or 70.8\%) responded Agree/Strongly Agree to the statement, "CHC needs more variety in the student clubs, organizations, special events or activities available here." Among the 362 students responding No Opinion to this statement, 219 (or 60.5\%) are those with little awareness about student clubs and organizations.

A different pattern emerges with respect to actually initiating new extracurricular offerings: 292 of the 484 of students with an opinion (or 60.3\%) responded Disagree/Strongly Disagree to the statement, "I would be interested in helping to bring more student clubs, organizations, special events or activities to CHC." Among the 296 students responding No Opinion to this statement, 170 are those with little awareness about student clubs and organizations.

A final but significant area of interest for students is athletics: 392 of the 500 with an opinion (or 78.4\%) responded Agree/Strongly Agree to the statement, "Starting an intramural or intercollegiate athletic program at CHC should be a priority for the campus community." The top sports receiving the most votes, indicating student interest as a participant or spectator, are Basketball (287 votes) and Baseball (251 votes). The complete ranked list is available in Appendix C.

Conclusions. The most important finding relative to student interest is somewhat of a myth buster. That is, the long-standing belief that community college students are working adult commuters with little time or interest in campus involvement may not hold true for CHC students. Significant numbers of respondents to this survey indicate strong interest in a full complement of extracurricular activities, from clubs to special events to formal athletic programs. Despite indications that students perceive CHC as not yet providing a full complement of extracurricular activities, few students feel compelled to actually initiate new offerings. However, this must be considered in the context of a dearth of student awareness of and participation in ASCHC and other currently available extracurricular offerings. In other words, students may lack interest in initiating new offerings (despite their beliefs that CHC needs new offerings) because they do not understand what it would entail. Furthermore, they have no direct experience in benefiting from sustained participation in extracurricular activities from which to draw direction or inspiration.

Recommended Implications for Practice/Planning Next Steps. The argument that improvements are needed in communications focused on increasing student awareness of the availability and merits of current extracurricular activities is further buttressed by the findings relevant to student interests. Despite not having a totally clear picture of what is available and how it can enhance one's college experience, students are open to learning more, becoming more involved, and seeing more variety in current offerings.

However, with little compelling interest among respondents to actually start anything new, it may be prudent to focus efforts on first crafting a core message about the contributions of active extracurricular involvement to one's college experience, and developing and implementing an effective means of communicating that message. Certainly, the notion of what constitutes an "effective means" of communication cannot be understood without ample, direct student involvement. Success in developing both the core message and the communication plan, then, necessitates collaboration between students, faculty, and staff.

Notwithstanding the absence of student interest in actually initiating anything new, a viable new direction the campus community could explore is the development of a formal athletic program
(intramural and/or intercollegiate). Student interests point towards team sports like basketball and baseball; hence, it would be prudent to explore and exploit opportunities to partner with the city of Yucaipa given its current programs and facilities, as well its plans to develop the land adjacent to the campus into ball fields. In addition, the arrival of a new swimming pool on the CHC campus obviously points to swimming (tied for $3^{\text {rd }}$ on the student list; see Appendix C) and other water sports as viable alternatives. Whatever direction is explored, it is imperative that physical education faculty remain key players in planning given their central role in implementing such a program.

## Student Satisfaction

Evidence. A majority indicated Disagree/Strongly Disagree or No Opinion in response to the statements, "I am satisfied with the VARIETY of student clubs \& organizations at CHC" (579 or $72.6 \%$ ), and "I am satisfied with the QUALITY of student clubs \& organizations at CHC" (593 or 74.4\%). With respect to the perceived impact of extracurricular activities on students’ educational experiences, a majority of students expressed No Opinion in connection with clubs and organizations (494 or 62.0\%), and with special events (408 or $51.2 \%$ ). While students report satisfaction with the necessity and usage of textbooks required in courses ( 447 or $56.1 \%$ ), significant numbers report dissatisfaction with the price (602 or 75.5\%) and availability (572 or 71.8\%) of textbooks.

Conclusions. Students are dissatisfied with the variety and quality of current extracurricular offerings and are furthermore unclear about the merits of such activities. As previously stated, this must be understood within the context of poor participation in and lack of knowledge about ASCHC, clubs, and organizations that characterizes the majority of respondents. Moreover, the dissatisfaction with both the price and availability of textbooks, although not surprising based on information gathered by ASCHC last year, offers continuing challenges; fortunately, students are at least satisfied with the relevance to and utilization of textbooks in their courses. While students see and have experienced the need for textbooks, they continue to express dissatisfaction about access (cost and availability) thereto.

Recommended Implications for Practice/Planning Next Steps. In addition to improvements in communication systems related to extracurricular activities, current offerings should be evaluated in terms of relevance to student interest and quality, and any information gleaned should be utilized in planning improvements thereto. Because access to textbooks continues to be an issue, assigning it a high priority status should be considered in order that an action plan can be developed, implemented, and evaluated.

Educational Programs and Services: Because this component is also made up of many survey items, results will again be organized around themes in order to piece together a clearer picture: Reasons for Choosing CHC; Comparisons with The Other Guys; Quality of Customer Service.

## Reasons for Choosing CHC

Evidence. Students indicated Agree/Strongly Agree to the following reasons for choosing CHC (in rank order by frequency of response):

- Convenient location
- Good academic reputation
- Specific vocational program
- Specific academic program
- Rejection from 4-year school
- Affordability
- Parent(s) chose for student

615 or 77.2\%
405 or $50.8 \%$
203 or $25.5 \%$
178 or $22.4 \%$
90 or $11.3 \%$
71 or $8.9 \%$
50 or 6.2\%

Conclusions. Three-quarters of respondents cite convenient location most frequently as the reason for choosing to attend CHC. For half, a good reputation and specific programs are additional attractions. When this pattern is considered in the context of small but steady enrollment declines over the past 2 years despite (1) well-documented population growth in surrounding areas; (2) the campus mandate to increase enrollments to support planned facilities; and (3) biases inherent in Spring term cohorts of CHC students (described below), a picture emerges that suggests more needs to be done in the way of outreach-that is, in creating reasons for students to choose CHC and for widening the scope of students who hear those reasons. Attracting a wider range of students necessarily demands additional attention to how we keep them, remembering that "access without success is an empty promise."

Here is the emerging picture of CHC's outreach-retention efforts derived in part from the findings about students' reasons for choosing CHC, and in part from prior research about student attrition at CHC: An analysis of CHC drop-outs reveals that large numbers of students enrolled at Fall census do not return to re-enroll the following Spring term. ${ }^{6}$ Therefore, the students included in this survey (administered late in Spring 2006 after census) represent not just survivors but the strongest survivors: Individuals who ostensibly possess personal attributes that would make them successful students at any college-assuming the college met some minimal standard of performance, quality, etc.

In other words, because these strong survivors have indicated that they selected CHC primarily because of its convenient location, very little needed to be done to attract them in the first place. Additionally, as strong survivors, very little may need to be done to ensure their success as students. Hence, if the yield from current outreach efforts is that we draw students who live nearby, our efforts are tantamount to inreach rather than outreach. Similarly, if the yield from current retention efforts is that we keep students by not getting in the way of their own inherent personal capacity to succeed, our efforts are tantamount to providing the minimum rather than

[^3]facilitating learning through high quality educational programs and support services.

Recommended Implications for Practice/Planning Next Steps. It is not clear whether a comprehensive, well-coordinated outreach function exists at CHC. Therefore, the first recommended practice is to learn what does exist-what currently constitutes an outreach activity, where the responsibility center for that activity rests, and what the impact of that activity has been. Once a clearer understanding is achieved, it may be that improvements can be planned. Should it be discovered that no comprehensive function exists, then its development can commence. Because both the district and campus have done much in the way of partnership work with local K-12 districts, ample opportunities exist to create a comprehensive, successful outreach function that is not only well-coordinated on campus, but is also well-coordinated with the K-12 community. Regarding retention efforts, many activities are currently in place to address this issue-efforts which have been given a tremendous boost of support (in actual dollars and campus morale) as a result of the Title V award and its

## Comparisons with "The Other Guys"

Evidence. Comparisons of CHC's programs and services with those at other community colleges yielded the following, listed in rank order by frequency of the response Agree/Strongly Agree that CHC has:

$$
\begin{array}{lll} 
& \text { Better teachers } & \begin{array}{l}
401 \text { or } 50.3 \% \\
(83.7 \% \text { of students with an opinion) }
\end{array} \\
\Delta \quad \text { Better academic reputation } & \begin{array}{l}
358 \text { or } 44.9 \% \\
(78.2 \% \text { of students with an opinion) }
\end{array} \\
\Delta \quad \text { Better schedule of classes } & \begin{array}{l}
316 \text { or } 39.6 \% \\
(65.2 \% \text { of students with an opinion) }
\end{array} \\
\Delta \quad \text { More relevant programs } & \begin{array}{l}
293 \text { or } 36.8 \% \\
(69.3 \% \text { of students with an opinion) }
\end{array} \\
\Delta \quad \text { Better student support services } & \begin{array}{l}
243 \text { or } 30.5 \% \\
(74.1 \% \text { of students with an opinion) }
\end{array}
\end{array}
$$

Conclusions. For half of the respondents, CHC's teachers are superior to those at other community colleges. A corollary finding is the perception that CHC has a better academic reputation. Approximately $1 / 3$ of students responded No Opinion.

Recommended Implications for Practice/Planning Next Steps. Following from recommendations in the previous section related to making improvements to outreach and
continuing efforts to improve educational programs and services via the Title V DREAMS program, these findings indicate CHC should be able to leverage its strong reputation (of its teachers and programs) as it ventures into unfamiliar territory, developmental education. To maintain this positive reputation among students and the community alike, it will be important to continue to uphold high academic standards while also bringing relevant programs, services, and strategies to a different kind of student-not necessarily the strong survivors these respondents seem to be. Again, attracting a diverse group of students demands additional attention to facilitating learning and retention through high quality educational programs and support services that reflect an understanding of their diverse needs.

## Quality of Customer Service

Evidence. Programs/Services patronized by most students received high frequencies of positive ratings (Good or letter grade of " $B$ "): Admissions \& Records, Counseling \& Assessment; Bookstore; Campus Library; Faculty/Teachers (see Appendix D for matrix of all areas and frequencies of all ratings). For all other areas, the most frequent response was No Opinion.

Conclusions. Customer service in key areas appears to be good; the high numbers of students indicating they have no opinion for other areas may be a concern. While many areas limit access of students by design due to mandated eligibility requirements (e.g., financial aid office, EOPS/CARE/CalWORKS, Disabled Students Office), other areas listed should be broadly accessible to students. The absence of an opinion potentially indicates students are underutilizing services available to them.

Recommended Implications for Practice/Planning Next Steps. Customer service should be an ongoing, broad concern across campus. While this survey indicates generally favorable results, a better strategy for enabling ongoing improvement is more regular surveying of student perceptions-for example, point-of-service surveys or more frequent surveying that is linked to the annual program review cycle.

An additional line of inquiry to pursue is the high number of ratings that are neither Excellent or Good. While a rating of Average might be acceptable in some circumstances, it is hoped that CHC sets higher standards in order to facilitate program improvement.

Student-College Integration. Additional questions related to students' reasons for choosing CHC over the many options available in this region, as well as to students’ overall sense of identification with CHC. Once again, the list of survey items relevant to this component appears in Appendix A.

Evidence. Students responded Agree/Strongly Agree as follows:

- CHC has a more exciting campus life 182 or 22.8\%
- Feel sense of ownership to CHC 376 or $47.2 \%$
- CHC has positive community image
- Proud to be student at CHC

512 or $64.2 \%$
483 or $60.6 \%$

Conclusions. Consistent with findings about CHC's strong faculty and academic reputation, respondents seem to indicate CHC is perceived positively in the community and that they are proud to tell others that they are students here. Also consistent with other findings is the characterization of campus life as NOT exciting. Overall, with respect to students' sense of identification with CHC-their integration of institutional attitudes and values-the sense of ownership and responsibility to CHC shows room for improvement. These findings in relation to Tinto's theory (1975) ${ }^{7}$ suggest that students appear to have strong academic integration but lack social integration with CHC as an institution. As a result, student institutional commitment is not optimal and, by extension, neither are student learning and retention.

Recommended Implications for Practice/Planning Next Steps. Certainly, the fact that a majority of respondents indicate CHC has a positive public image, and that they personally are proud to be students here, the absence of a strong campus life does not bode well for our current retention efforts. The campus community needs to understand the role, importance, and impact of well-designed extracurricular activities on student learning and retention. Furthermore, that understanding must translate into designing, implementing, and evaluating comprehensive retention efforts that include purposeful strategies that bring student life to the campus.

[^4]
## Summary of Planning Implications

The following points are offered by the Office of Research \& Planning as mere conversation starters. If meaningful activity is to result from this initiative, it is critical that the campus community actively engage in discussions about the ideas below and, more importantly, explore additional ideas not mentioned in the narrative of this report but indicated by actual student responses to the survey items (found in Appendix E). Without such dialogue, the campus community squanders a rare opportunity handed to us by the ambitious efforts of ASCHC.

## Physical Plant/Campus Environs

- Extend appreciation for (read, reinforce) continuing efforts to maintain safety, cleanliness, and beauty of interior and exterior spaces on campus.
- Continue practice of identifying problems with campus conditions in order to bring about solutions.
- Highlight beauty of campus physical surroundings in marketing efforts, but understand that more is needed to truly attract and retain students.

## Student Clubs, Organizations, Special Events \& Activities

## Student Awareness

- Make improvements to communications focused on increasing student awareness of all extracurricular activities available on campus, making explicit the intended impact on student life so that resource allocations can be made appropriately.
- Study existing practices on campus which have shown to be effective in improving student learning, creating student life, and/or building a community of students-for example, the Emergency Services program. Generalize or apply lessons learned as appropriate.

## Student Interests

- In making improvements to student communications about extracurricular activities, craft a core message about the contributions of active extracurricular involvement to one's college experience. Ensure active student involvement, as well as participation by other campus constituencies.
- Determine what specific extracurricular offerings might garner more student participation.
- Explore development of a formal athletic program (intramural and/or intercollegiate) through the Physical Education department, starting with the sports identified by students herein
(basketball, baseball, swimming). Seek out and leverage partnerships with the city of Yucaipa as available and appropriate.

## Student Satisfaction

- Evaluate current extracurricular offerings in terms of relevance to student interest and quality. Plan for improvements using what was learned.
- Address student dissatisfaction with access to and costs of textbook.

## Educational Programs and Services

## Reasons for Choosing CHC

- Determine what outreach efforts exist at CHC, and what resources are available to improve those efforts (both within the campus and external to the campus, for example in the way of P-16 partnerships). Develop, implement, and evaluate an outreach plan.
- Determine how the DREAMS Express program (Title V) can facilitate and contribute to outreach efforts.

## Comparisons with "The Other Guys"

- Capitalize on the positive reputation of CHC's teachers and programs in the development and marketing of DREAMS Express and other efforts to attract students.
- Continue to uphold high academic standards in bringing relevant programs, services, and strategies to a new group of students. This is arguably more important than any slick marketing campaign in maintaining CHC's positive reputation in the community.

## Quality of Customer Service

- Develop an ongoing means to gauge quality of customer service across campus, such as point-of-service surveys or more frequent surveying that is linked to the annual program review cycle. In connection with this effort, debate the merits of and establish a campus commitment to an acceptable minimum rating in determining the "health" of a program in customer service terms.

## Student-College Integration

- Involve the campus community in learning about the role, importance, and impact of welldesigned extracurricular activities on student learning and retention. Translate that understanding into designing, implementing, and evaluating comprehensive retention efforts that include purposeful strategies for bringing student life to the campus.

## Appendix A: Survey Items by Component

Survey Items Related to Physical Plant/Campus Environs

- I feel safe on campus during the day (item 1 ).
- I feel safe on campus at night (item 2).
- Compared to other community colleges, Crafton Hills College has a more beautiful campus (item 58).
- Compared to other community colleges, Crafton Hills College has better kept classrooms/facilities (item 63).

Survey Items Related to Student Clubs, Organizations, Special Events \& Activities

## Student Awareness

- I am aware of all the student clubs \& organizations available at CHC (item 3).
- I am involved in at least one student club or organization at CHC (item 4).
- I am satisfied with the VARIETY of student clubs \& organizations at CHC (item 5).
- I am satisfied with the QUALITY of student clubs \& organizations at CHC (item 6).
- The student clubs \& organizations here at CHC have a positive impact on my educational experiences (item 7).
- As they arise, I am made aware of all the special events \& activities offered at CHC throughout the year (item 8).
- In the past year, I have attended a special event or activity offered at CHC (item 9).

Student Interests

- I have no interest in being knowledgeable about or involved in any student clubs or organizations (item 16).
- I have no interest in attending or participating in any special events or activities offered at CHC, unless it is specifically related to a class assignment (item 17).
- CHC needs more variety in the student clubs, organizations, special event or activities available here (item 18).
- I would be interested in helping to bring more student clubs, organizations, special events or activities to CHC (item 19).
- Starting an intramural or intercollegiate athletic program at CHC should be a priority for the campus community (item 20; also included were a list of possible sports from which students were asked to indicate their interest either as a spectator or participant).

## Student Satisfaction

- I am satisfied with the VARIETY of special events \& activities offered at CHC (item 10).
- I am satisfied with the QUALITY of special events \& activities offered at CHC (item 11).
- The special events \& activities here at CHC have a positive impact on my educational experiences (item 12).
- I am satisfied with the necessity and usage of textbooks required in my courses here at CHC (item 13).

## Survey Items Related to Student Clubs, Organizations, Special Events \& Activities

Student Satisfaction

- I know what Associated Students is, the role it plays on campus, and am interested in what it can do for me as a student at CHC (item 15).
- I am satisfied with the price of textbooks here at CHC (item 14a).
- I am satisfied with the availability of textbooks here at CHC (item 14b).

## Survey Items Related to Educational Programs and Services

Reasons for Choosing CHC

- I chose to attend CHC because of its affordability (item 49).
- I chose to attend CHC because of its convenient location (item 50).
- I chose to attend Crafton Hills College because of its good academic reputation (item 51).
- I chose to attend Crafton Hills College because of a specific vocational/technical program (item 52).
- I chose to attend Crafton Hills College because of a specific non-vocational/academic program (item 53).
- I chose to attend Crafton Hills College because I did not get accepted to a 4-year college/university (item 54).
- I did not choose to attend Crafton Hills College; my parents chose it for me (item 55).

Comparisons with The Other Guys

- Compared to other community colleges, Crafton Hills College has a better academic reputation (item 56).
- Compared to other community colleges, Crafton Hills College has more relevant programs (item 59).
- Compared to other community colleges, Crafton Hills College offers a better schedule of classes (item 60).
- Compared to other community colleges, Crafton Hills College has better student support services (item 61).
- Compared to other community colleges, Crafton Hills College has better teachers (item 62).

## Quality of Customer Service

- Students were also asked to rate the quality of customer service received from the following: Admissions \& Records; Counseling \& Assessment; Financial Aid Office; Bookstore; Transfer \& Career Center; Associated Students Office; Campus Business Office; Cafeteria; Campus Police; Communications Office; Campus Library; Learning Resources Center; Health \& Wellness Center; EOPS/CARE/CalWORKS; Disabled Students Office; Student Success Advisors; and Faculty/Teachers.

Survey Items Related to Student-College Integration

- Compared to other community colleges, Crafton Hills College has a more exciting campus life (item 57).
- As a student, I feel a sense of ownership of and responsibility to Crafton Hills College (item 64).
- Crafton Hills College has a positive image in the community where I live (item 65).
- I am proud to tell others that I am a student at Crafton Hills College (item 66).

## Appendix C: Ranked List of Campus Athletics

Prompt as appeared on survey: In your opinion, please indicate which of the sports shown below students would be most interested in--either as a participant or spectator. (RESULTS SHOWN IN RANK ORDER BASED ON NUMBER OF VOTES RECEIVED).

1. Basketball (287)
2. Baseball (251)
3. Swimming (198)
4. Other Sports (198)
5. Softball (178)
6. Tennis (143)
7. Golf (131)
8. Track \& Field (129)
9. Water Polo (119)
10. Diving (72)
11. Cross-Country (67)

## Appendix D: Service to Students

Prompt as appeared on survey: For the campus programs, services, or departments shown on the right, please rate the quality of customer service you have encountered. (RESULTS SHOWN IN ORDER APPEARED ON SURVEY. FREQUENCIES SHOWN IN BOLD AND GRAY INDICATE HIGHEST NUMBER OF RESPONSES FOR EACH PROGRAM/SERVICES).

| Program/Services | A <br> Excellent | B Good | C <br> Average | $\stackrel{\text { D }}{\text { Poor }}$ | $\begin{gathered} \text { F } \\ \text { Very Poor } \end{gathered}$ | N <br> No Opinion or No Response |
